

**Winterville Auditorium Renovation**  
**Bid Addendum #10260 - 2**

It has been brought to our attention that we did not address one issue brought up at the bidder's conference. Since accurate cost estimates for the structural support of HVAC RTUs would require hiring an architect to design it properly, can the bidder provide a rough estimate instead? We stipulate that the bidder does not need to hire an architect for the estimate, but we do want approximate estimates that the bidder considers appropriate.
